Locapex Five apex locator

ARE YOU LOOKING FOR A CUTTING EDGE DEVICE THAT IS BOTH COMFORTABLE AND SIMPLE?

With the Locapex Five,
take advantage of our experience aimed exclusively for your needs

durability

The Launched in 2005, the Locapex Five is a simple, sturdy machine. Even after falling off the worktop, your locator will assist you in your endodontic treatments. More than a machine, it is a real partner.

battery life

Your IONYX apex locator allows you to safely work with two standard commercial LR06 (AA) batteries. The battery life can range from 6 months to over a year depending on the extent of your endodontic activity. The measuring quality remains the same, regardless of the charge level of the batteries.

ergonomics

By means of a signal-filtering system, your Locapex Five eliminates false information as your file advances into the canal (virtual apex).

ease of use

It is easy and straightforward to handle thanks to a single button for activating the device.

YOUR PARTNER FOR MORE THAN 20 YEARS

Established in 1993 and located in France in the Bordeaux region, **the company IONYX designs and manufactures specialized machines for endodontics.**

Intended for general practitioners seeking to improve the quality of their treatment and their comfort, **the entire IONYX range is designed for daily and easy practice.**

Present everywhere in the world through its wide network of distributors, **IONYX is one of the most recognized experts in the field of dentistry.**

TECHNICAL CHARACTERISTICS

a 100% digital measurement

The signal emitted by your Locapex Five is 100% digital. There is no drift or modification over time in the accuracy of your IONYX apex locator.

the apex on the display

The apex on the display corresponds with the cementum-dentine junction. (See diagram 1 opposite)

apex overshoot alert

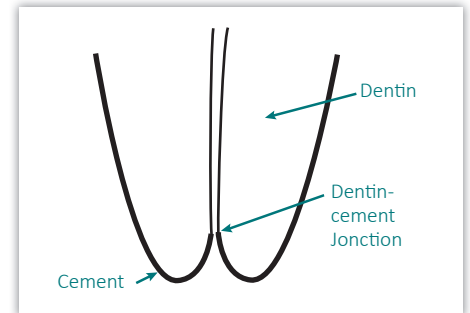

When the locator overshoots the apex, the indicator lights on the Locapex Five flash between the "Apex" mark and the 1 mm mark.

instant measurement system

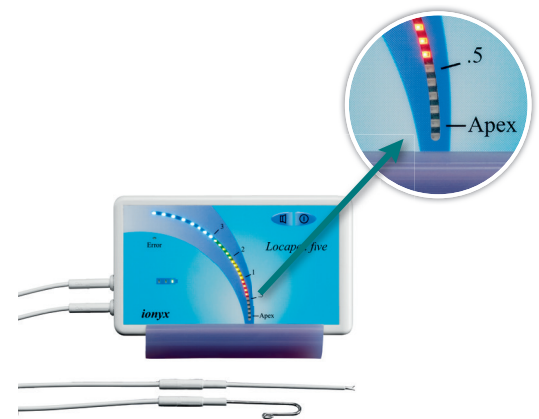

The instant measurement system provides you with information on the position of your file in the canal the moment it comes into contact with the Probe Tip or your file Grip.

viewing angle of over 160°

This angle enables you to view the progression of your file towards the apex, regardless of the position of your device.

1 | Cementum-dentine junction.

2 | Indication of stop apex > 0,5 mm before.

*The electronic unit of the Locapex Five is guaranteed for 2 years.
The accessories are guaranteed for 1 year.*
